Sandwich Units

SW72-12-FB

SW60-24M-FB

Continental Refrigerator offers a “One of a Kind”, NSF7 listed Sandwich Unit. What makes it unmatched in the marketplace, is the fact that it is the only forced air sandwich prep table designed with non-recessed pans that do not require an “over-the-top” air curtain. This unique feature allows the foodservice operator easy access to both food and pans with safer and quicker cleaning—no air ducts to clean above pans, and food remaining fresh longer - no discoloring or “drying out” of food in pans! An extensive product line featuring 70 configurations in 27”, 48”, 60” and 72” widths are available in multiple pan configurations, with options including front breathing and drawer models, to fit virtually any need. *Call us about units available in stock for quick shipment.*

Consult Specialized Marketing for pricing and lead times.
